

LV2 S T O R Y

DESCRIPTION

The LV2 is a two story add-on that allows you to stack LV Series (LVS) units. You can stack any LVS unit on top of any other to create your own custom home. LV add-on's are custom connections between LVS units; therefore you will need to engage our design staff to integrate the add-on's to your LVS home. This brochure contains specific information with respect to the LV2, but it does not contain general information that is shared amongst all the LVS homes. You must supplement this brochure with: **LVS Design** and **LVS Build**.

SQUARE FOOTAGE:	Same as LVS Unit
OVERALL DIMENSIONS:	Same as LVS Unit
TYP. CEILING HT. (Throughout):	9'-0"

LV2 CONNECTION

Below are examples of the LV2. Connections vary depending on your site and needs; therefore, we will need to customize our construction sets to create your home. To learn more about customizations, read the **LVS Design** brochure
